Heavy industry, materials and coal handling/mining experience is desirable:

- **Project Director**
- **Senior Controls Manager**
- **Senior Procurement Manager**
- **Project Controls include Project Controls Manager, Project Estimators, Schedulers and Planners**
- **Senior Project Managers (coal background)**
- **Project Manager - Mechanical Construction**
- **Project Manager - Civil Construction**
- **Construction Managers (brownfield and greenfield)**
- **Environmental Engineer/Scientist**
- **Project Engineers - Civil/Structural, Mechanical, Electrical & Process**
- **Site Supervisors - Mechanical, Electrical and Civil**
- **Piping Drafters**
- **Design Drafters – Desirable to have AutoCAD/Prosteel**
- **Contract Administrators**
- **Project Administrators**
- **Document Controllers**

### **MANAGER OF PROJECTS**

As a result of significant company growth, the position of Manager of Projects has been newly created to take responsibility for developing and leading the team of project professionals. This is an excellent opportunity for you as an experienced project manager to oversee multidiscipline engineering projects, and provide mentoring for your team. In addition, you will take responsibility for the management and delivery of projects in a variety of industries, particularly in mining/materials handling and other related heavy industry.

### **MATERIALS HANDLING PROCESS ENGINEER**

This is an excellent role for an engineer with some experience in materials handling to work alongside industry experts and continue to develop technical Coal Preparation Plant skills. You will have a qualification in either chemical, mechanical or industrial engineering, along with some CHPP design experience.

### **ASSET MANAGEMENT SERVICES**

Several of our blue chip clients are expanding into asset and risk management services and seeking reliability professionals in coal face consulting to provide specialist services and expertise to industry. Ideally you will come from a trade background, have further tertiary qualifications and experience in condition monitoring. Desirable industry backgrounds include power and energy, water as well as oil and gas. These positions are based both locally in Newcastle/ Hunter region and interstate.

## **PRINCIPAL ELECTRICAL ENGINEER**

Due to continued growth and major projects, a vacancy exists for a Senior/Principal Electrical Engineer. To be successful in this position you will require degree qualifications in Electrical Engineering, and have significant previous experience in Instrumentation and Controls. A background in coal mining/coal handling would be highly regarded, however not essential. You will have previous consultancy experience, and excellent communication skills.

## **ENGINEERING MANAGER**

Our client is a successful engineering consultancy with an excellent reputation, based in Newcastle. Due to continued growth in both project delivery and engineering design, a newly created opportunity exists for an Engineering Manager to oversee the design office.

You will have an Engineering degree qualification along with significant previous experience in heavy industry, mining and materials handling. Ideally you will have previous consultancy experience and excellent communication skills.

## **SITE MANAGER**

This is a senior position working on one of the Hunter's largest Coal Handling projects.

To be successful you will require significant previous Construction Site experience within a Coal Handling or Coal Mining Infrastructure environment - meaning you must have the appropriate experience to hit the ground running.

Broad scope of the project will include CHPP -civil, structural, mechanical, electrical, instrumentation and control. This demanding and pivotal position will be recognized with a significant salary package for the right applicant - Don't miss this opportunity!

## **CIVIL ENGINEER**

Our client is looking for an enthusiastic Civil Engineer with a solid background in practical civil construction. You will be installing civil works and be responsible for the management of contractors. You will also manage site safety, quality and the schedule.

This is an 'on the ground' position doing ground preparation, laying concrete and foundations etc. This exciting position will also offer the potential to progress from this role into the structural and mechanical side of the project for the right applicant. Apply Now!

## **ELECTRICAL DESIGN ENGINEER**

### **Newcastle - Permanent**

Our client is seeking an experienced and suitably qualified design engineer with Switch yards / Substations experience (HV). **Applicants with Powertools software experience will be highly regarded.** The role will involve a large amount of design work on projects from tender through to commissioning. The role is predominately office based, however your support during site commissioning may be required. This is an exciting opportunity to work on interesting and challenging Hunter power projects, so apply now!

## **MECHANICAL AND STRUCTURAL ENGINEERS**

### **Newcastle - Perm or Contract**

To be successful in these roles you must:

- Be Degree Qualified in either Structural or Mechanical Engineering
- Have materials/coal handling experience (10+ years)

Structural Engineers from other industries (e.g. architectural etc) looking to move into heavy industry will be considered.

Our client is keen to secure both Mechanical and Structural Engineers now, for their projects beginning in March 2010. Don't miss this excellent opportunity to join a firm working on some of the regions largest coal/materials handling projects.

## **SENIOR DESIGN DRAFTERS**

### **Newcastle - Perm or Contract**

Our client is a Large Engineering firm in the Maitland area that will be working on several very large mining projects from March 2010. If you are interested in a long term opportunity, working on some of the Hunter's most exciting projects and have experience in AutoCAD and Prosteel, then we need to hear from you! Very competitive rates will be offered to successful candidates, on either a permanent or contract basis.
